Dive in

Not all water is the same

Alb shower filters transforms conventional tap water into noticeably softer water, reduced by chlorine, heavy metals and pollutants.

Protect yourself against acute Legionella alarms (shower ban) and against viruses, bacteria, germs and mould fungi in your pipes at home.

Ideal for the natural, biological body care of women, men and families as well as their health protection at home and on travels.

Did you know?

Frequently controlled does not mean best possible. The water ordinance regulates approx. 50 limit values whereas industry and the environment can cause up to 100,000 impurities and pollutants to occur in our water.

Shower and bath filters

Beauty starts with water

Our customers are convinced:

Itching, neurodermatitis and skin irritations as well as people who are suffering from "Winter itch" (desiccation-dermatitis), experience has shown that they can experience noticeable relief.

Our certified bacteria and germ filter removes up to 99.9% of all pathogens from the water. Among others Legionella and E.Coli bacteria.

More effect

Your shower - your wellness temple

Filtered water promotes moisture absorption and cell renewal in the skin. Provide lasting beautiful hair and healthy skin.

Hard water forms together with soap "insoluble salts" (lime soap), which remains on the skin and hair after showering. Precious ingredients of cosmetics cannot be completely utilized. Filtered, soft water ensures that this effect is significantly reduced. Thus care products can unfold their effect in a more effective way.

Did you know?

60° Legionella only will die at a temperature of 60 °C and above and are thus rendered harmless.

Retention of pollutants

Safety for the whole family

Our drinking water regulations set limit values for pollutants in our tap water.

Unfortunately, compliance with limit values does not mean that the water is free of pollutants. The suppliers must be able to offer the water cheaply and the quality therefore usually remains a pure cost question.

In particular the addition of chlorine can damage our skin and hair!

- Chlorine, odours and taste
- Organic compounds
- Heavy metals
- Pesticides
- Medicinal residues
- Microplastics
- Asbestos fibres
- Bacteria and germs

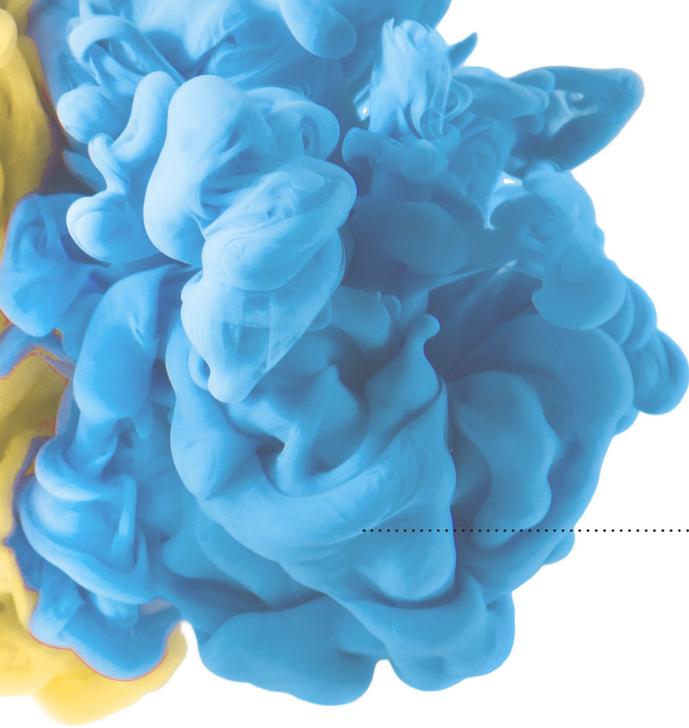

Discover your colourful side

At the moment there are six different colours to choose from. Depending on your fitting, wall colour or preference.

Other special colour editions such as champagne or gold are also available.

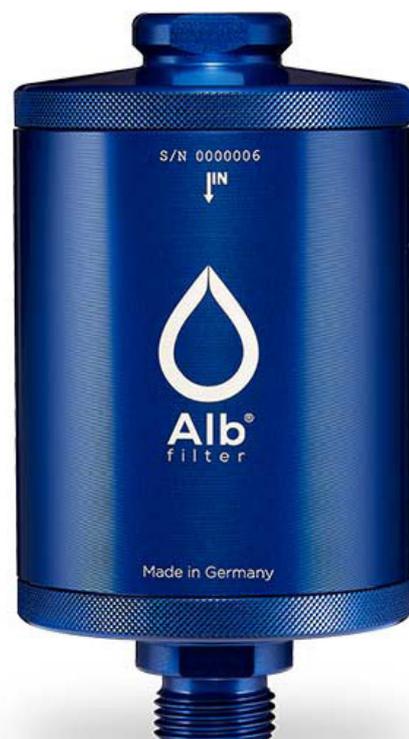

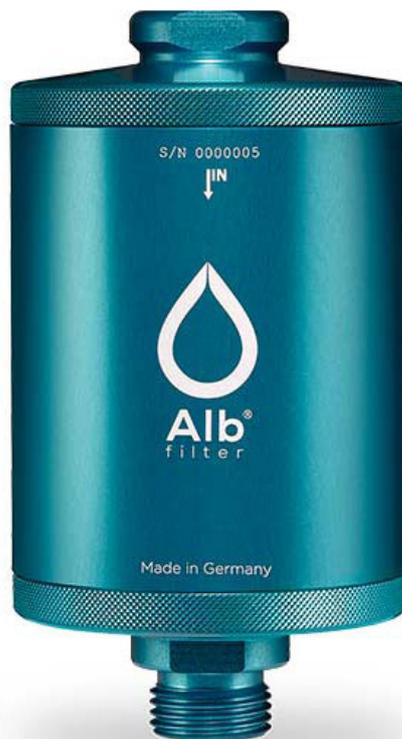

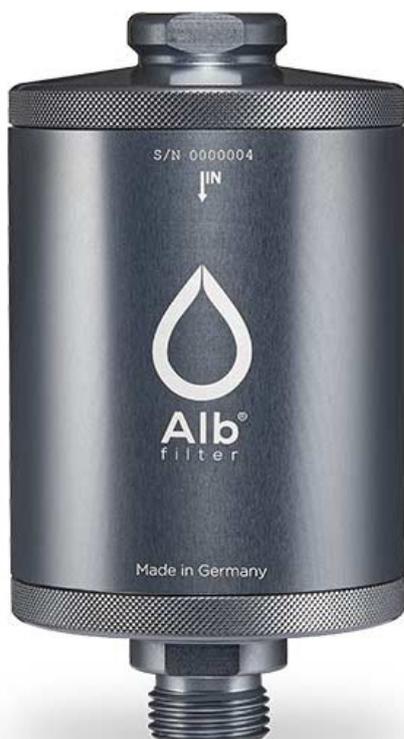

Alb shower filter

Quality made in Germany

Our Alb filters are made of a high quality, food grade metal alloy and can be used for many years due to their corrosion resistance.

No professional expertise is required to install the filter. The connection is very simple and can be done in a few minutes.

One fits all - the housing is compatible with all Alb shower and drinking water cartridges.

Field of application

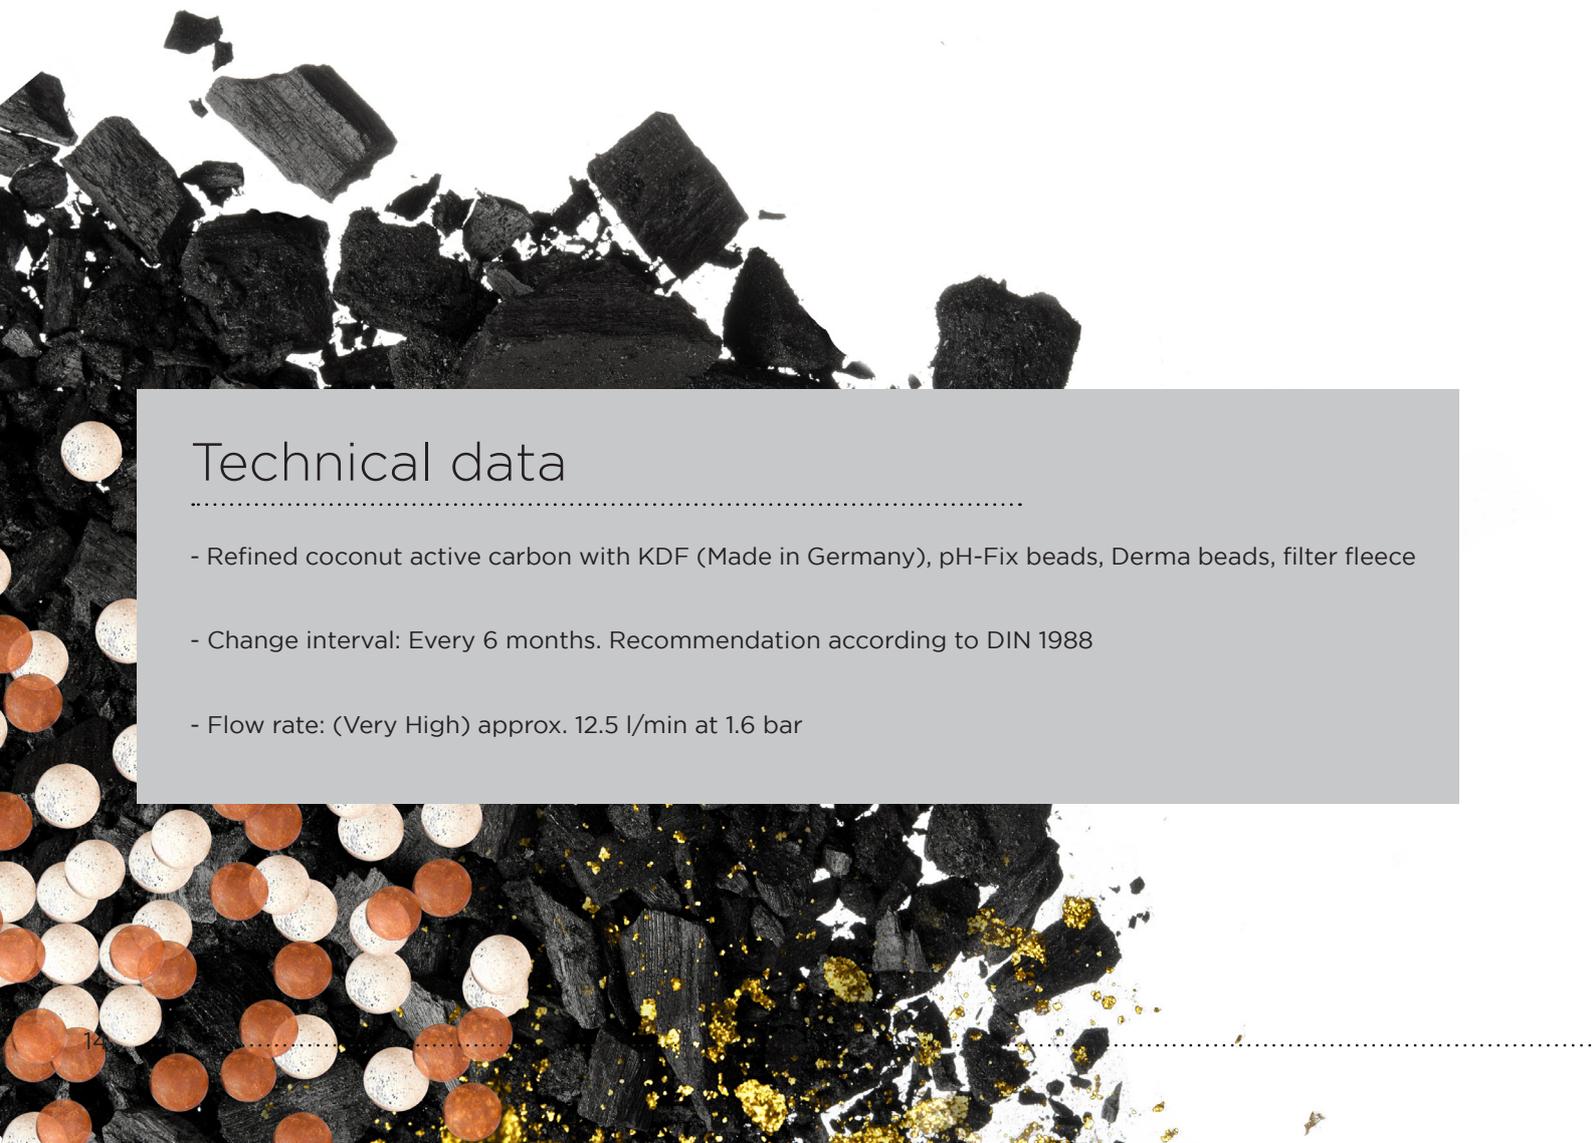

Pleasantly soft water - causes of dry, itchy skin and brittle hair can be reduced.

Natural coconut activated carbon and KDF removes harmful substances, reduces chlorine and heavy metals.

Mineral mix for optimal moisture absorption and soothing of the skin.

Technical data

- Refined coconut active carbon with KDF (Made in Germany), pH-Fix beads, Derma beads, filter fleece
- Change interval: Every 6 months. Recommendation according to DIN 1988
- Flow rate: (Very High) approx. 12.5 l/min at 1.6 bar

Alb Filter Balance

The Standard shower filter

Experience the difference!

Our Alb Filter Balance contains a multi-stage cartridge made of various minerals and refined coconut activated carbon. For pure natural water directly from your shower. Without harmful substances such as chlorine, heavy metals and residues of medical drugs, the pH-stabilized water feels noticeably softer and subsequently helps to improve the effect of care products.

Users report a clear alleviation of itching, neuro-dermatitis and skin irritations.

Field of application

Discover the velvety-soft shungite feeling. Invigorating and caring at the same time.

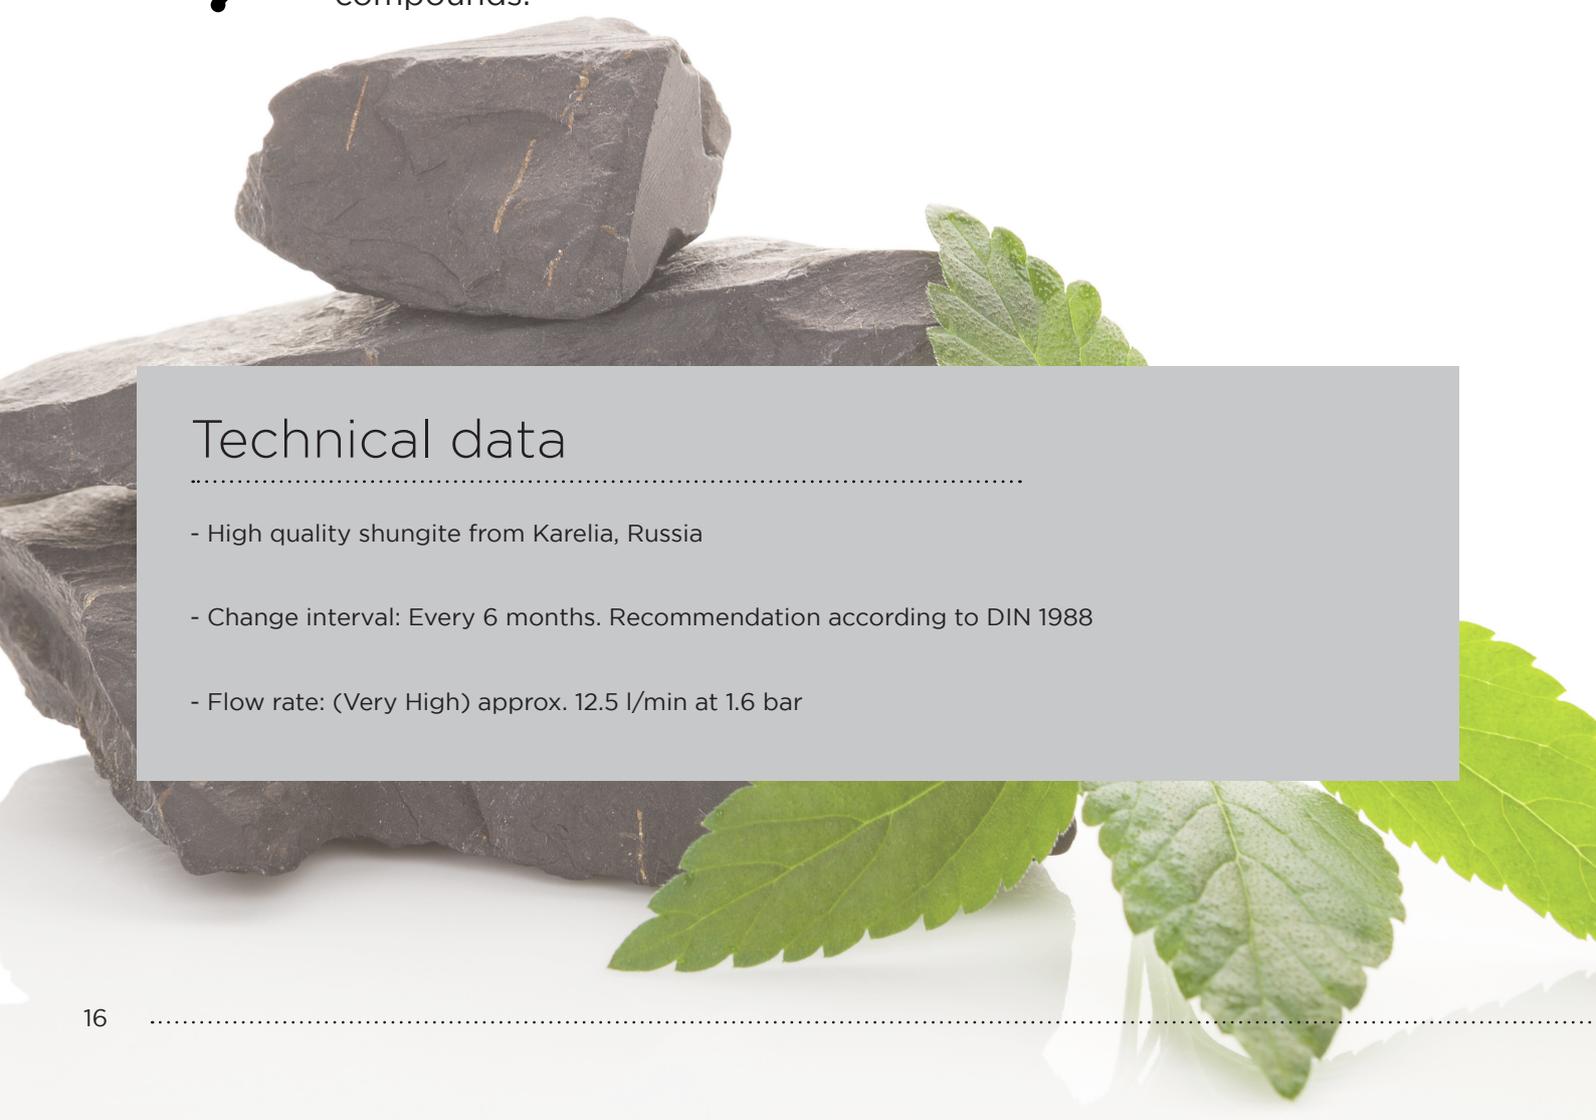

A shungite shower can have a positive effect on your overall well-being.

Due to its molecular structure, shungite should be able to absorb and bind free radicals, which are also responsible for the aging process of the skin.

Shungite can reduce the microbial count of water and break up harmful organic compounds.

Technical data

- High quality shungite from Karelia, Russia
- Change interval: Every 6 months. Recommendation according to DIN 1988
- Flow rate: (Very High) approx. 12.5 l/min at 1.6 bar

Alb Filter Shungit

Water from the primeval rock

A wonderful combination. A cartridge filled with the rare and almost 600 million years old mineral shungite rock from Karelia, Russia can contribute it to the mineralization and purification of your water.

In anti-aging research, shungite is sometimes called an effective "fountain of youth". The hollow-spherical carbon species fullerene is said to bind radicals sustainably and also influence the aging process of the skin. In addition to outstanding absorption properties, Shungit also has bactericidal properties.

Field of application

Filtration and retention of microplastics, asbestos fibres, etc.

With an acute ban on showering and positive Legionella findings.

**Filtration of smallest microorganisms (~99,99%)
E. coli bacteria, Vibrio cholerae, shigella,
Salmonella etc.**

Technical data

- Bundled high performance diaphragm
- Pore fineness: Up to 0.1 micrometers (the multitude of hollow fibers is 0.08 micrometers)
- Change interval: Every 6 months. Recommendation according to DIN 1988
- Flow rate: (High) approx. 11,7 l/min at 1,75 Bar

Alb Filter Nano

In case of positive Legionella findings

Nothing is as important as your health!

Whether preventive or with positive Legionella findings: The Nano water filter reliably protects you against Legionella and dangerous microorganisms in shower and drinking water. The quality solution is certified in Germany and offers the highest level of protection against Legionnaire's disease, pneumonia, immunodeficiencies and many more.

Developed and manufactured in Germany with highest demands on material and quality of the 0.1 micrometer hollow fiber membrane.

In the shower

For this purpose the Alb Filter is mounted between the fitting and the shower hose. For rain showers, directly in front of the shower head.

Point of use of your Alb shower filter

Our low-maintenance and durable shower filters are easy to install. Whether you install the Alb filter in the shower, in the bathtub or in both areas is up to you. The connection usually only takes a few minutes.

The cartridge change usually takes place every six months and is also done in a few steps.

In the bathtub

Installation in the bathtub can also be done via the shower hose, depending on the manufacturer's design of your tap/bathtub.
